

Forest Acres Corridor Study

City of Forest Acres | Columbia, SC

BOUDREAUX

EXISTING - FOREST DRIVE AND BELTLINE BOULEVARD

The Forest Drive Corridor Study analyzed the existing and projected traffic counts and explored options for improving the corridor's efficiency, safety and aesthetics. The purpose was to provide implementable strategies and a path for moving forward and to improve the corridor. Forest Drive is the lifeline, the spine to the community and to the city's assets. Every effort should be made to ensure that Forest Drive thrives and can continue to support, efficiently and beautiful, the quality of life elements enjoyed by residents and visitors.

RENDERING OF BELTLINE BLVD.

The intent and hope of the recommendations is to improve conditions for the short-term and long-term. Many of the recommendations are focused on ensuring that Forest Drive is efficient and sustains prosperity and the quality of life for years to come. While these should and will improve Forest Drive over the next three to five years, the intentions are that the recommendations will provide a perpetual framework for improvements, redevelopment and new development that will exemplify the vision of this plan.
